The Optima STAR Long Fund (the "Fund") Class H Shares (USD) a sub-fund of APSLEY FUND ICAV (the "ICAV")

ISIN: IE00BYZJ9463

Objectives and Investment Policy

The Fund aims to create long-term increases in the value of its assets.

The Fund will seek to achieve this by investing primarily in equities and American Depositary Receipts which are listed or traded on recognised markets in the United States. The Fund will have a predominant exposure to US equity markets across all industries and sectors.

The Fund will invest in a selection of equity holdings favoured by a carefully selected group of hedge fund managers. The Fund will generally invest in a diversified portfolio of 40-50 different equity positions from the five-top performing equity allocations selected by 10 hedge fund managers which the investment manager of the Fund has selected. These equity positions must be US listed, publicly traded equities and American Depositary Receipts. The Fund will adjust these positions on a quarterly basis or more frequently depending on cash flows and other public information released on the hedge fund managers' allocations.

The Fund will also hold a cash balance of between 1% and 4% of the portfolio and may be higher or lower than that, depending on cash movements relating to subscriptions, redemptions and market fluctuations.

The Fund may use instruments whose value is determined by changes in the value of the underlying instruments they represent (derivatives) as set out in the Fund's supplement in order to manage the Fund more efficiently (e.g. reducing risks or costs).

For more information about the investment policy, see "Investment Objectives and Policies" in the Fund's supplement.

Risk and Reward Profile

Lower Risk ←—————→ Higher Risk
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is categorised as category 6 because variations in the price of its units are typically high due to the concentrated nature of the portfolio and as a result of investing in equities in developed markets, the prices of which may rise and fall.
