Forward contracts maybe used to hedge or gain exposure to an increase in the value of assets similar to these describe in investment policies section. Options may be used to hedge or achieve exposure to a particular market instead of using a physical security. Foreign exchange contracts may be used to reduce the risk of adverse market changes in exchange rates or to increase exposure to foreign currencies or to shift exposure to foreign currency fluctuations from one country to another.
- The Fund is actively managed in reference to the MSCI EMU (the "Benchmark") as its performance is compared to the Benchmark in marketing materials and the Fund's performance is measured against the Benchmark for the purposes of calculating the performance fee as set out below under the heading "Performance Fees".
