**Commentary**

The Fund posted a positive performance in August, with both equity and fixed-income investments registering positive performances. On the equity side, the main positive contributors to the Fund performance had been Esprinet, Wacker Neuson, CNH Industrial and Pirelli. Esprinet rose as the reference sector experienced a positive development in July, and expectations about a positive year for the company increased. Wacker Neuson gained as the company unveiled Q2 results above expectations and communicated a FY 2020 guidance which triggered analysts upgrades. The main detractors to the Fund performance during the month had been Fila, Hunting Plc, Acerinox and Danone. Fila declined as the company continued to be penalized by the uncertainties related to the opening of schools in September. Acerinox underperformed due to the difficult outlook for the European stainless-steel sector, penalized by the negative impact of high imports from Asia. The fixed-income part of the portfolio registered a positive performance, with all the holdings contributing positively, with main contributors being Accor 01/2024 and ArcelorMittal 01/2024 corporate bonds. During the month the main trades executed had been the sale of Michelin and Wacker Neuson, and the purchase of Verallia and La Doria.
