

Key Investor Information

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Albemarle Long Short Fund (the "Fund") Class A2 Shares (EUR) a sub-fund of Albemarle Funds Plc (the "Company")

ISIN: IE00BL641G52

Objectives and Investment Policy

The Fund aims to generate, over 3-5 years, a combination of average yearly positive returns and average yearly volatility of returns.

With respect to equities, REITs, GDRs, ADRs, the investment process, both for long and short positions, is based on a medium-term investment horizon and two pillars: macro/geopolitical research and fundamental analysis.

The Investment Manager will research global macro and geopolitical topics, leveraging on its know-how and professional network. As a result, the Investment Manager will identify macro and geopolitical themes (positive and negative), either global or affecting specific countries, which are deemed important in the medium to long-term horizon. Such themes include, for example: changes in political leadership and economic policies, country-specific events, events affecting securities prices and interest rates, trade and military confrontations.

The fundamental analysis will focus mainly on sectors, which are highly impacted by such macro and geopolitical themes, namely Financials, Real Estate, Energy, Transportation and Aerospace & Defence. Companies belonging to these sectors will be analysed from both a qualitative and quantitative standpoint.

With regard to bonds, these will be included in the portfolio where deemed beneficial to do so by the Investment Manager, as the primary objective of the Fund is to implement a long/short equity strategy.

The Investment Manager will define the asset allocation taking into consideration macroeconomic and geopolitical scenarios, interest rates expectations, as well as the specific opportunities available following its investment process.

Synthetic short strategies may be used to hedge or substantially offset long positions held by the Fund and may also be used for investment purposes. The Fund may take both long and/or short positions in each category of assets in which it may invest but will primarily take such positions through equities and fixed income securities.

The Investment Manager will seek to structure the portfolio, so that in normal circumstances it has a long/short ratio of between 90% - 130% long and 30% to 70% short. The Fund may have little or no short exposure for significant time periods; however when in the opinion of the Investment Manager, opportunities exist to meet the Fund's investment objective through the use of short strategies, the Fund's exposure may be increased. If the use of derivatives is extensive, this may increase the volatility of the Fund's performance.

The Fund is actively managed and is not managed in reference to a benchmark.

For more information about the investment policy, see "Investment Objectives and Policies" in the Fund's supplement.

Risk and Reward Profile

Lower Risk Higher Risk
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is in category 5 because exposure to stocks, both long and short, may be subject to high price fluctuations. The value of the shares may fall and you may not get back the amount you invested. The value of the shares will be affected by the deduction of fees and expenses.

- Historical data may not be a reliable indication for the future
- Risk category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

On September 21, 2020, the Fund changed its name from Albemarle Targe Italy Fund Hedged to Albemarle Long Short Fund and its Investment Objective and Policy underwent a material change. As the share class has been in existence for less than one calendar year's performance, there is insufficient data to provide a useful indication of past performance to investors. The Fund offers no guarantee or protection. The following risks may not be adequately captured by the risk and reward indicator:

- Investment risk;
- Stock market risk;
- Economic and market events risk;
- Credit risks; and
- Derivative securities risks.

For a detailed explanation of these and other risk factors, please refer to the section entitled "Investment Risks" in the Company's prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of operating the Fund, which include the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

For more information about charges, please refer to the "Fees & Expenses" section of the Fund's supplement.

One-off charges taken before or after you invest	
Entry Charge	Up to 5% of net assets
Exit Charge	Up to 3% of net assets
Switching Fees	Up to 5% of net assets
Repurchase Fees	Up to 3% of net assets
Charges taken from the Fund over the year	
Ongoing Charges	4.39% (Estimate)
Charges taken from the fund under certain specific conditions	
Performance fee	15% in excess of the High Water Mark

The ongoing charges figure is based on estimated expenses including investment management fees, administrator fees, director fees, depositary & trustee fees, audit fees. This figure may vary from year to year and is expected to decline as the assets in the Fund increase. This figure excludes:

- Performance fees
- Portfolio transaction costs

Past Performance

The Fund was established on 19 October 2016. As the share class has been in existence for less than one calendar year's performance, there is insufficient data to provide a useful indication of past performance to investors.
