The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

**The Optima Lloyd George Asia Fund (the "Fund") Class A Shares (EUR) a sub-fund of APSLEY FUND ICAV (the "ICAV")**

**The Fund is managed by KBA Consulting Management Limited (the "Manager")**

**ISIN: IE00BJCWXV85**

## Objectives and Investment Policy

The objective of the Fund is to generate positive returns over the medium term by investing in Asian equities while seeking to reduce volatility through selective hedging.

The Fund will seek to achieve its investment objective by investing up to 100% of its assets directly in Asian equities including in Emerging Market equities and/or indirectly through financial derivative instruments which are listed or traded on a Recognised Market.

The portfolio is expected to consist typically of 30 to 50 equity positions.

The Fund may invest in and have direct access to China A shares listed on the Shanghai and Shenzhen Stock Exchanges via the Stock Connect. Exposure to China A shares through the Stock Connect will not be more than 40% of the Fund's Net Asset Value.

The Sub-Investment Manager will seek to structure the Fund's portfolio so that in normal circumstances it has a long/short ratio of net exposure between 75%- 125% long and 0%-50% short.

The Fund may also invest in participatory notes, which are debt securities issued by banks or broker-dealers which embed a swap. Participatory notes are designed to replicate exposure to an equity, equities or an equity market index. Such participatory notes may be used to access equities in India until such time as the Fund is registered with the Securities and Exchange Board of India.

The Fund may also invest up to 10% of its Net Asset Value in liquid financial assets or money market instruments which are not listed, traded or dealt in on a Recognised Market, and up to 10% of its assets in Australian equities.

Other Information:

- The Fund may be leveraged as a result of its use of financial derivative instruments, but such leverage will not exceed 100% of NAV at any time.
- The Fund may, at the discretion of the Sub-Investment Manager, hedge against currency fluctuations in non-US Dollar denominated portfolio investments.
- The Fund will seek to hedge against currency risk arising from Shares being designated in a currency other than US Dollars.

The Fund is actively managed in reference to the MSCI AC Asia ex Japan Index (the "Benchmark") as its performance is compared to the Benchmark in marketing materials. Investments in the portfolio are not specifically selected from the constituents of the Benchmark, hence the Fund's investment policy is in no way constrained and the degree of deviation from the Benchmark may be significant.

**For more information about the investment policy, see "Investment Objectives and Policies" in the Fund's supplement.**

The Fund is categorised as category 6 because high variations in the price of its units may arise due to the concentrated nature of the portfolio and, as a result of investing in equities in emerging markets, the prices of its investments may be more volatile than investments in developed countries.
