Albemarle Long Short Fund (the "Fund") Class A Shares (EUR)
a sub-fund of Albemarle Funds Plc (the "Company")
The Fund is managed by KBA Consulting Management Limited (the "Manager")
ISIN: IE00BDHF6007

Objectives and Investment Policy

The Fund aims to generate, over 3-5 years, a combination of average yearly positive returns and average yearly volatility of returns.

With respect to equities, REITs, GDRs, ADRs, the investment process, both for long and short positions, is based on a medium-term investment horizon and two pillars: macro/geopolitical research and fundamental analysis.

The Investment Manager will research global macro and geopolitical topics, leveraging on its know-how and professional network. As a result, the Investment Manager will identify macro and geopolitical themes (positive and negative), either global or affecting specific countries, which are deemed important in the medium to long-term horizon. Such themes include, for example: changes in political leadership and economic policies, country-specific events, events affecting securities prices and interest rates, trade and military confrontations.

The fundamental analysis will focus mainly on sectors, which are highly impacted by such macro and geopolitical themes, namely Financials, Real Estate, Energy, Transportation and Aerospace & Defence. Companies belonging to these sectors will be analysed from both a qualitative and quantitative standpoint.

With regard to bonds, these will be included in the portfolio where deemed beneficial to do so by the Investment Manager, as the primary objective of the Fund is to implement a long/short equity strategy.

The Investment Manager will define the asset allocation taking into consideration macroeconomic and geopolitical scenarios, interest rates expectations, as well as the specific opportunities available following its investment process.

Synthetic short strategies may be used to hedge or substantially offset long positions held by the Fund and may also be used for investment purposes. The Fund may take both long and/or short positions in each category of assets in which it may invest but will primarily take such positions through equities and fixed income securities.

The Investment Manager will seek to structure the portfolio, so that in normal circumstances it has a long/short ratio of between 90% - 130% long and 30% to 70% short. The Fund may have little or no short exposure for significant time periods; however when in the opinion of the Investment Manager, opportunities exist to meet the Fund's investment objective through the use of short strategies, the Fund's exposure may be increased. If the use of derivatives is extensive, this may increase the volatility of the Fund's performance.

The Fund is actively managed and is not managed in reference to a benchmark.

For more information about the investment policy, see "Investment Objectives and Policies" in the Fund's supplement.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is in category 4 because exposure to stocks, both long and short, may be subject to high price fluctuations. The value of the shares may fall and you may not get back the amount you invested. The value of the shares will be affected by the deduction of fees and expenses.
