Commentary

The Fund posted a positive performance in May, outperforming the benchmark - which on the contrary posted a negative result - by c. 150bps. The main positive contributors to the Fund performance had been Krones, Corticeira Amorim, Jungheinrich, Norma and Plastic Omnium. Krones and Corticeira Amorim gained as both companies reported Q1 2022 results which beat analysts estimates. Jungheinrich and Norma shares recovered partially after the strong sell-off which hit both stocks from the start of the war in Ukraine. The main detractors to the Fund performance during the month had been Dometic, Nobia, Esprinet, Marr and Synergie. Dometic and Nobia fell as high inflation and a potential reduction in household disposable income could have a negative impact on the demand over the coming months. Synergie underperformed as investors feared that an economic slowdown could have an adverse impact on the demand for temporary employment services. During the month the main trades executed had been the sale of GVS, Cie Automotive, Wacker Neuson and Nacon, and the purchase of Jungheinrich, Marr, Datalogic and Valmet
