**Investment Policy**

Albemarle Target Italy is a long-only equity fund that invests at least 80% of its assets in equities with particular focus on Italian small-mid caps. The net exposure will be between 80% and 100% of the asset allocation. The fund adopts a bottom-up approach combined with a top-down overlay.

**Commentary**

The Fund consolidated its year-to-date gain in August, outperforming the benchmark by c. +200bps over the month. The main positive contributors to the Fund performance had been Esprinet, Fila, Iveco, De' Longhi and Tinexta. Esprinet rebounded benefitting from some short covering amid indications that the sector should bottom out in 2023. Fila rose as the company announced solid H1 2023 results, raised its FY 2023 free cash flow guidance and announced that its Indian subsidiary Doms Industries filed for an initial public offering on the Indian Stock Exchange. Iveco outperformed as the Italian truckmaker delivered another upgrade to its full-year guidance that prompted analyst to significantly increase their estimates. The main detractors to the Fund performance during the month had been Stellantis, Cementir, Pirelli, Piovan and Marr. Stellantis declined following both the underperformance of the Auto&Parts sector and the difficulties of the Detroit Three in reaching a deal with the United Automobile Workers, an issue which could entail several risks for Stellantis such as a strike and increasing personnel cost in North America. Piovan declined on the back of the negative performance of the Capital Goods sector in Europe amid weakening economic data and outlook. During the month the main trades executed had been the sale of Tinexta and Buzzi, and the purchase of Esprinet.
