**Investment Policy**

Albemarle Target Italy is a long-only equity fund that invests at least 80% of its assets in equities with particular focus on Italian small-mid caps. The net exposure will be between 80% and 100% of the asset allocation. The fund adopts a bottom-up approach combined with a top-down overlay.

**Commentary**

The Fund posted a negative performance in October, underperforming the benchmark by over 200bps, penalized again this month by the strong underperformance of Small&Mid Caps. The main positive contributors to the Fund performance had been Cementir, Tinexta, De' Longhi, El.en and Sogefi. Cementir rose as few analysts pushed the stock ahead of Q3 results foreseeing a likely guidance upgrade. De' Longhi gained as analysts expected positive Q3 results with good sales momentum and improving margins. Sogefi outperformed as the company released Q3 results ahead of expectations and improved its 2023 guidance. The main detractors to the Fund performance during the month had been Brembo, Iveco, Fila, Esprinet and Datalogic. Brembo declined following the Auto&Parts sector lower as investors started to expect softer Q3 numbers well below the H1 2023 trend. Datalogic underperformed as the management started to a more bearish demand scenario with a downturn expected to last until H1 2024. During the month the main trades executed had been the sale of Sogefi, Cembre and Mondadori, and the purchase of Brembo, Technogym and El.En.
